South Chicago Heights, Illinois 60411

Subject: Municipal well sampling
CERCLIS ID No. ILD 980 901 508

Dear Mr. Brink:

The U.S. Environmental Protection Agency (USEPA) retained BLACK & VEATCH Waste Science (BVWS) to conduct an environmental investigation of a site in your area beginning on March 27, 1995. The purpose of the visit is to conduct sampling and gather additional information about environmental conditions in the area surrounding the sampling site.

BVWS is interested in sampling South Chicago Heights municipal well #2 (Jackson Ave. and 27th St.) as part of this study. The samples should only take approximately 30 minutes to collect. The samples will be analyzed for several hundred different compounds and through the Illinois Department of Public Health a copy of these results will be sent to you within several months.

To assure the legitimacy of this visit and the statutory basis for the sampling, please direct questions to Mr. Alan Altur, USEPA, at 312/886-0390. Please inform me of your response at 312/683-7826 before March 27 so that a sampling schedule can be coordinated with your office.

Sincerely,

BLACK & VEATCH WASTE SCIENCE, INC.

Oliver Graf
Environmental Engineer
